

complementary care

Dr. Min S. Ahn believes empowering patients to make informed decisions is his number one role as a facial plastic surgeon. The Harvard University graduate delivers a high caliber of care and compassion, spending ample time getting to know each patient in order to fully explain potential procedures and their anticipated results.

BOARD CERTIFICATION

American Board of Facial Plastic and Reconstructive Surgery

American Board of Otolaryngology/Head and Neck Surgery

MEDICAL DEGREE

George Washington University

OTOLARYNGOLOGY/HEAD AND NECK SURGERY RESIDENCY

University of California, San Francisco

Fellow, American College of Surgeons
American Medical Association

PROCEDURES PERFORMED

Facelift

Mini-Facelift

Rhinoplasty

Blepharoplasty

Laser Resurfacing

Aesthetic Injectables

Latisse®

With patients who hail from the Northeast and around the world to undergo treatment with him and his team, Dr. Ahn invites new patients to attend his monthly seminars where they can meet the doctor, his staff and former patients in a relaxed setting. "Our seminars are fun and informative, enabling patients to get their questions answered without feeling pressured," he explains.

Believing less can be more, Dr. Ahn routinely adopts less-invasive surgical techniques, and sometimes even noninvasive protocols to rejuvenate youth. "In terms of facial surgery, MACS-Lifts allow for a quicker recovery because the incisions are shorter. Patients are put into a light sleep, so there is no general anesthesia required." When patients' concerns are only pertaining to the top third of the face, Dr. Ahn may suggest lifting the brows ever so slightly through a small-incision temple lift. "When we can hide incisions, patients reap the benefits," he says. "Patients are seeking maximum results with minor downtime to accommodate their busy lifestyles. While there is no substitute for more extensive procedures, we can help curtail the aging process through less-invasive treatments." Committed to giving back, Dr. Ahn frequently volunteers with organizations like Voices Against Violence to help victims of domestic violence. "These women have been through so much," he says. "It's truly a privilege to be a part of their healing process."

FRAMED PHOTOS ON YOUR DESK Myself with my wife and two children

I START EACH DAY With coffee and reading my newspapers

RIGHT NOW I'M READING Books by Truman Capote

I'M NEVER WITHOUT A pen

INSIDE INFORMATION

SURGERY-FREE REJUVENATION

Reversing the ravages of time is a high priority for many of Dr. Ahn's patients. Ever on the leading edge of technology, Dr. Ahn offers **FRAXEL RE:STORE™** and **FRAXEL RE:PAIR™** laser treatments, noted for their ability to turn back time. Fraxel technology erases pigmented lesions, wrinkles and scars, while **TIGHTENING AND RESURFACING THE SKIN**. "Fraxel can be combined with surgical procedures when patients seek comprehensive rejuvenation. But younger patients and those with only minimal signs of aging may attain their desired results with Fraxel alone." For those patients with hollows in the mid-face, there are injectable treatments available where the doctor administers fillers to plump out sunken, deflated features, **NONSURGICALLY**. "We have a host of innovations at our fingertips that allow for rapid rejuvenation, with minimal and in some cases no downtime."
